Sequences *are a football metric that quantifies the plays within a team's ball possession.*
It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.
During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.
This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build ..
