CUP**

GAME NOTES

Referee
Deily Gómez

- CSD Municipal's Cristian Hernández has provided his third assist in the Concacaf Central American Cup, making it the third consecutive edition in which he has delivered a goal-scoring pass: with Antigua GFC against Independiente in 2024, with CSD Municipal against Sporting SM in 2025, and today.
- Verdes FC's Krisean López was the player of the match with the most attempted (12) and successful (eight) dribbles. He became the first player in the last two editions of the Concacaf Central American Cup to reach 12+ for attempted dribbles, having also done so against FC Motagua on Matchday 1 of the current edition.
- Verdes FC's Nahjib Guerra is the only Belizean player to have created two or more chances (2) and delivered seven or more crosses (7) in a single Concacaf Central American Cup match across the last two editions of the competition. He previously achieved this last year against Deportivo Saprissa.
- CSD Municipal had more possession (53% to 47%) than Verdes FC in today's match; the Guatemalan side have had more possession than their opponents in five of their last six Concacaf Central American Cup games (W2 D4), with the exception being a 4-4 draw against CS Herediano in the last edition (47%).
- CSD Municipal have won their first away game in the Concacaf Central American Cup after five matches on the road (D2 L2). This is also their first away match in the competition where they have kept a clean sheet.

Sequences are a football metric that quantifies the plays within a team's ball possession.

It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.

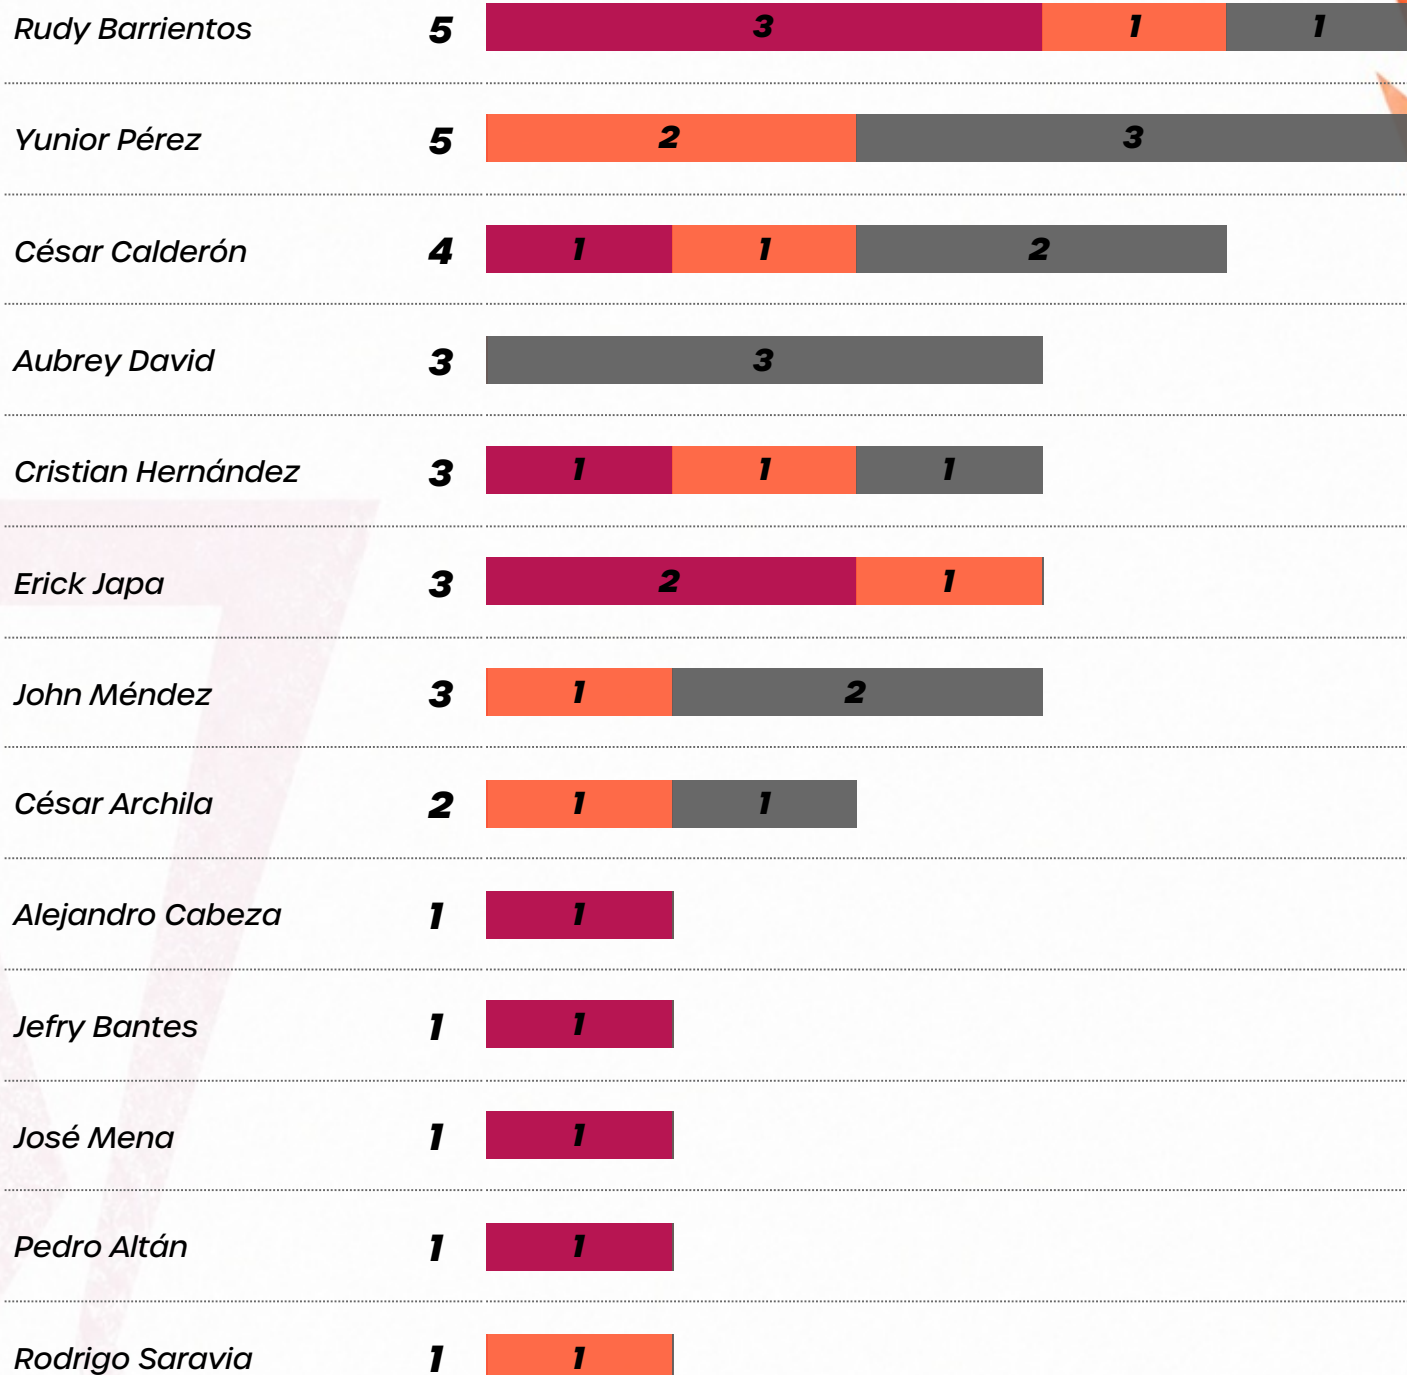

During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.

This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build ..
