GAME NOTES

Club Olimpia

2 - 0

Deportivo Mixco

Referee
Richard Tejada

Club Olimpia remain unbeaten in their Concacaf Central American Cup debuts (W3 D1), winning their last three opening matches with a clean sheet.

Club Olimpia have extended their unbeaten home run in the Concacaf Central American Cup to nine matches in Honduras (W6 D3).

Club Olimpia's Jorge Benguche is the Concacaf Central American Cup's all-time leading scorer, having netted his 13th goal in the competition, two more than Agustín Auzmendi. All of his goals have come for Club Olimpia, and he is also the only player to have scored in all four editions of the competition to date.

Edwin Rodríguez has provided six assists in the Concacaf Central American Cup, the third-most in the competition's history, one fewer than Jorge Serrano and two fewer than Jesús López. All of his assists have come for Club Olimpia. He is also the second player to assist in all four editions of the competition, after Jorge Serrano.

Deportivo Mixco had 20 shots against Club Olimpia, a figure that only Alajuelense have managed against the Honduran side in the Concacaf Central American Cup since 2025 (20 shots in the second leg of the semi-finals).

ATTACKING SEQUENCES INVOLVEMENTS

- Shot
- Chance Created
- Build Up to Shot

Sequences are a football metric that quantifies the plays within a team's ball possession.

It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.

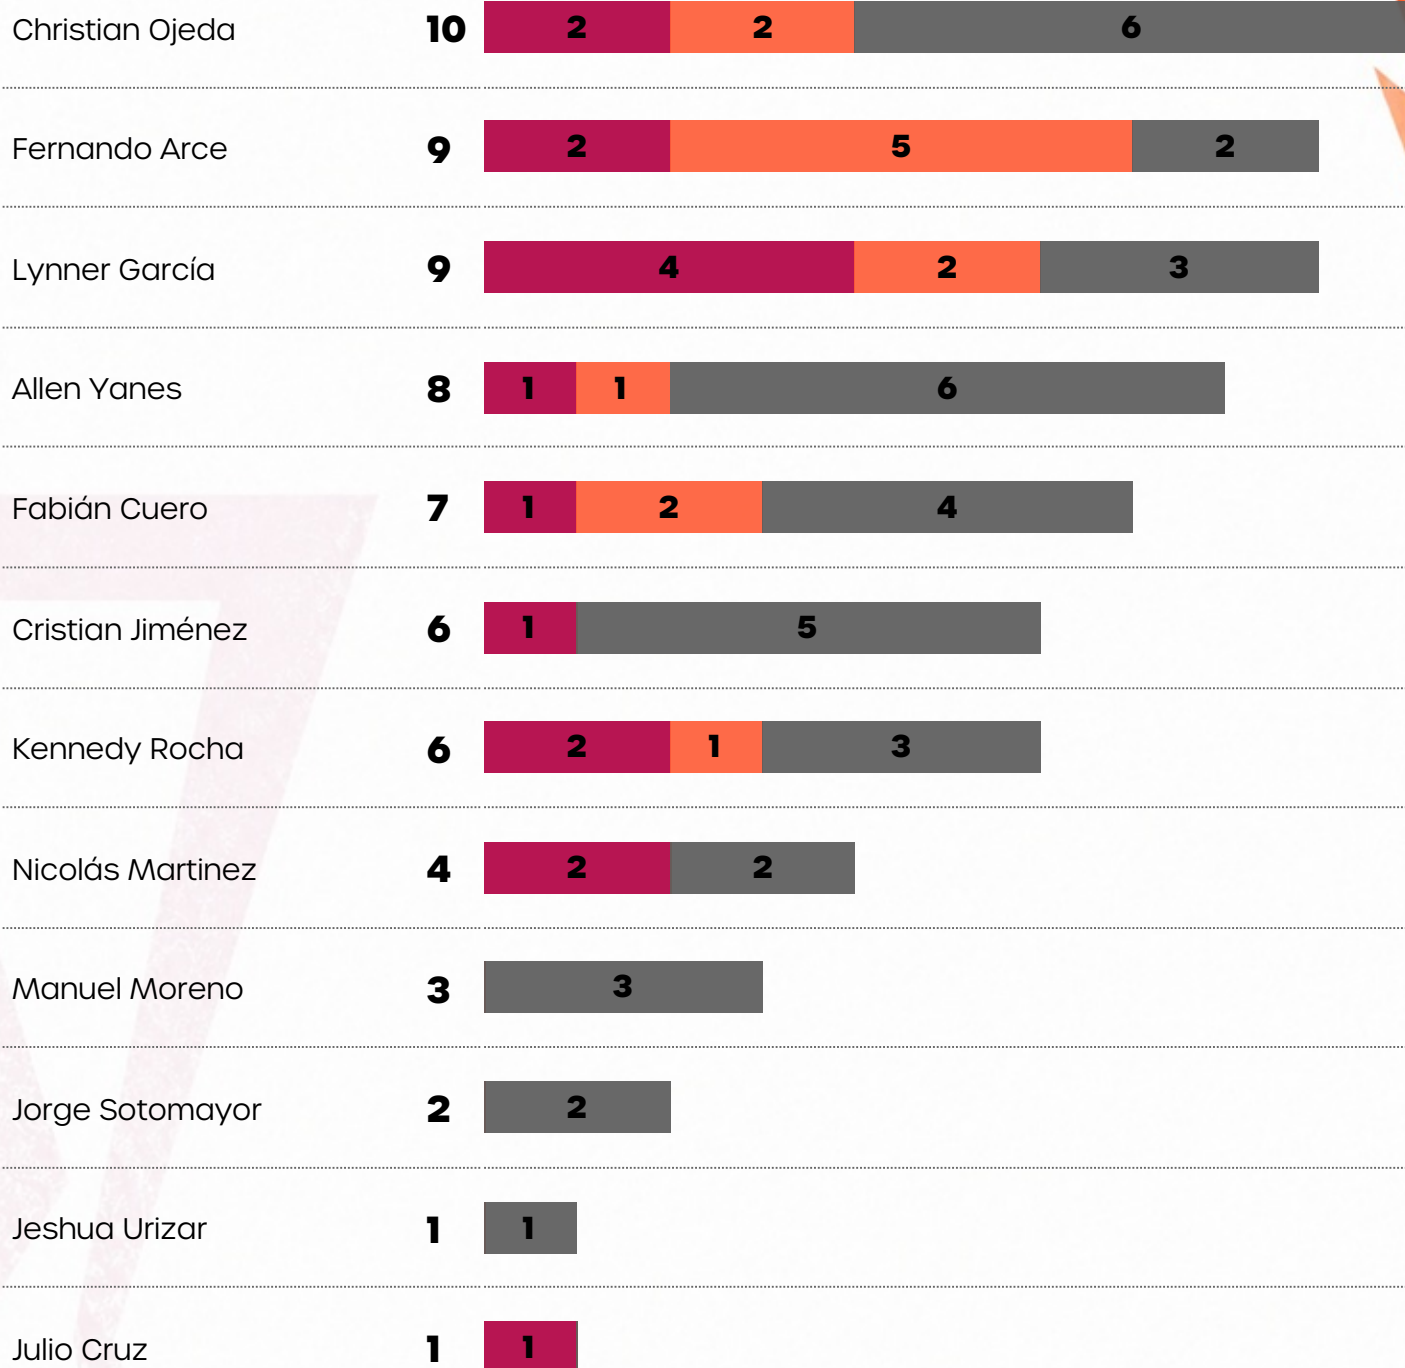

During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.

This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build up ..

Sequences are a football metric that quantifies the plays within a team's ball possession.

It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.

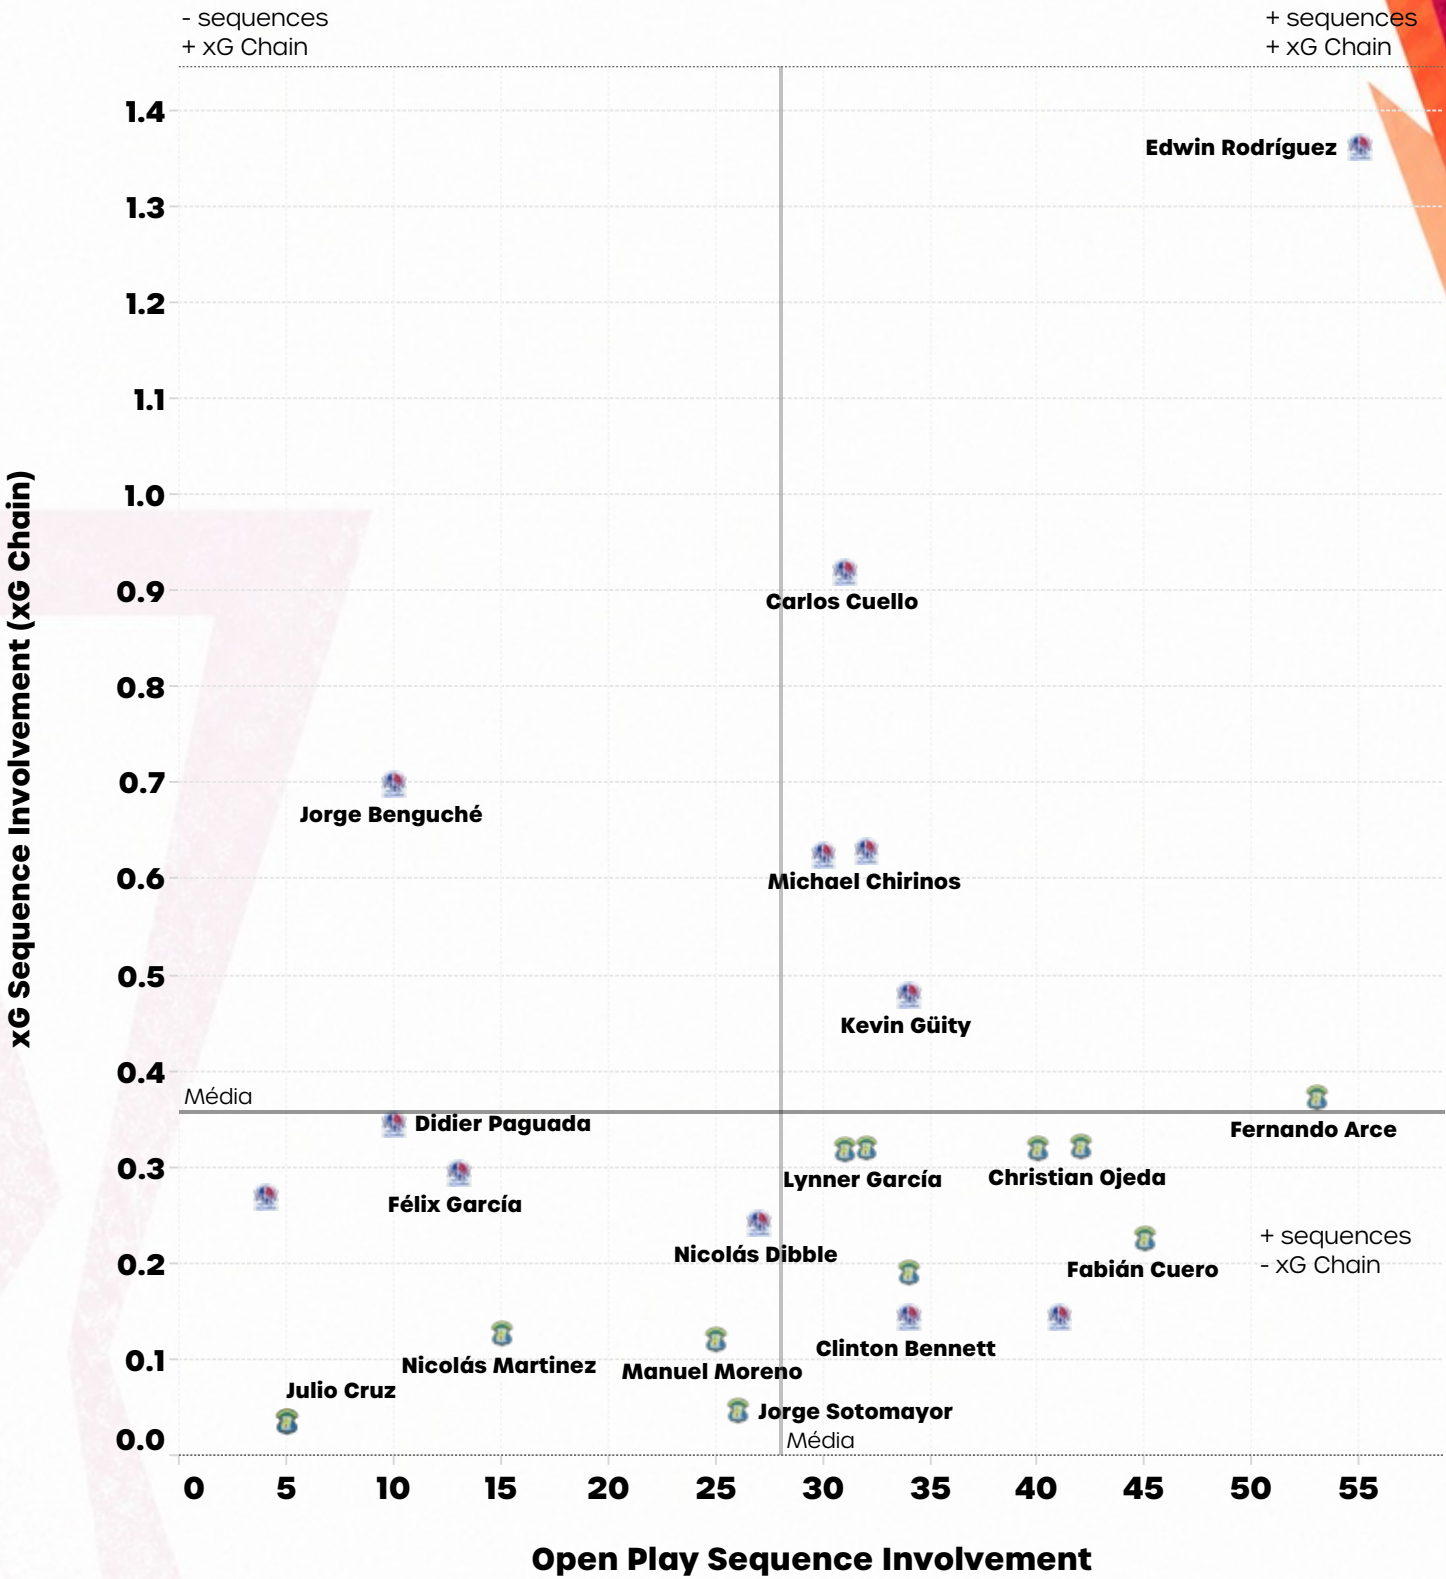

During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.

This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build up ..

SEQUENCES INVOLVEMENTS & xG CHAIN

Open Play Sequence Involvement The number of unique open play sequences that a player was involved in.
(Note: these are unique because multiple involvements in a single sequence will only count as one involvement).

xG Sequence Involvement (xG Chain) (xG Chain) The total xG value of unique open play shot or goal ending sequences that a player was involved in.
