GAME NOTES

Herediano

0 – 0

Marathón

Referee
Diego Ojer

- Herediano remain unbeaten in their home matches in the Concacaf Central American Cup (W4 D5); this was only their second goalless draw at home in the competition, following their stalemate against Motagua in 2024.
- Marathón's Javier Rivera produced the highest expected goals (xG) attempt of the match with his 54th-minute header, which was valued at 0.15 xG
- Herediano registered nearly twice as many shots as Marathón (11 to 6) in their Concacaf Central American Cup group stage match, yet both sides produced similar expected goals figures (0.42 xG to 0.35 xG).
- Herediano have registered exactly 11 shots in each of their last three Concacaf Central American Cup matches; their three shots on target against CD Marathón were the fewest of those three games. Furthermore, Herediano failed to score in two of those fixtures, with the other being a 4-4 draw against Municipal.
- Herediano enjoyed 55% possession against CD Marathón, outpossessing their opponent for the fourth consecutive match in the Concacaf Central American Cup; furthermore, their 83% passing accuracy was their highest recorded in the competition across the last two editions.

ATTACKING SEQUENCES INVOLVEMENTS

- Shot
- Chance Created
- Build Up to Shot

Sequences are a football metric that quantifies the plays within a team's ball possession.

It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.

During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.

This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build up ..
