GAME NOTES

Concacaf NATIONS LEAGUE

Panama 2 - 0 **Curaçao**

• Panama's José Fajardo is the second player to score a brace as a substitute in the 2026-27 Concacaf Nations League League A, following Curaçao's Kenji Gorré against Costa Rica in September; it was also the first brace by a Panama player in the competition in over four years, since Yoel Bárcenas against Martinique in June 2022.

• Panama extended their unbeaten run against Curaçao in the Concacaf Nations League to three games (W2 D1), following their 2-0 victory today, a 2-1 win in October 2023 and a 0-0 draw in the first leg of this tie.

• Panama have qualified for the Concacaf Nations League (League A) semifinals for the fourth time in the five editions of the competition, including each of the last four (2022/23, 2023/24, 2024/25, 2026/27).

• Panama conceded just 0.17 expected goals from seven shots faced against Curaçao, with their average of 0.02 xGA per shot faced being the lowest of any team in a single Concacaf Nations League match this season (level with two other games involving Anguilla and St. Lucia).

• Panama's Cristian Martínez alone created almost as many chances (5) as all Curazao players combined (6) in this match.

ATTACKING SEQUENCES INVOLVEMENTS

Concacaf NATIONS LEAGUE

Build Up to Shot
Chance Created
Shot

Sequences are a football metric that quantifies the plays within a team's ball possession.
It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.
During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.
This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build up of the sequence. The calculation excludes set pieces.
