GAME NOTES

Referee
Orlando Alvarado

Motagua have secured a win by three or more goals while keeping a clean sheet in the Concacaf Central American Cup for only the second time; the first instance was also against Verdes on matchday one of the 2023 edition (5-0).

Motagua's Jonathan Moya scored two goals after coming off the bench in their win against Verdes; he's only the second player in the club's history to net two or more goals as a substitute in a single Concacaf Central American Cup match, following Yeison Mejía against Tauro in 2024.

Motagua's Alejandro Reyes provided two assists against Verdes today, becoming only the third Honduran player to register two or more assists in a single Concacaf Central American Cup match.

Motagua recorded 43 touches in the opposition box against Verdes today, the most by the Honduran side in a single Concacaf Central American Cup match since 2025.

Motagua didn't allow Verdes a single shot on target in today's match; this is only the second time a team has restricted their opponent to zero shots on target in a Concacaf Central American Cup match since 2025, following Plaza Amador's performance against Real España in the quarter-finals last year.

Sequences are a football metric that quantifies the plays within a team's ball possession.

It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot.

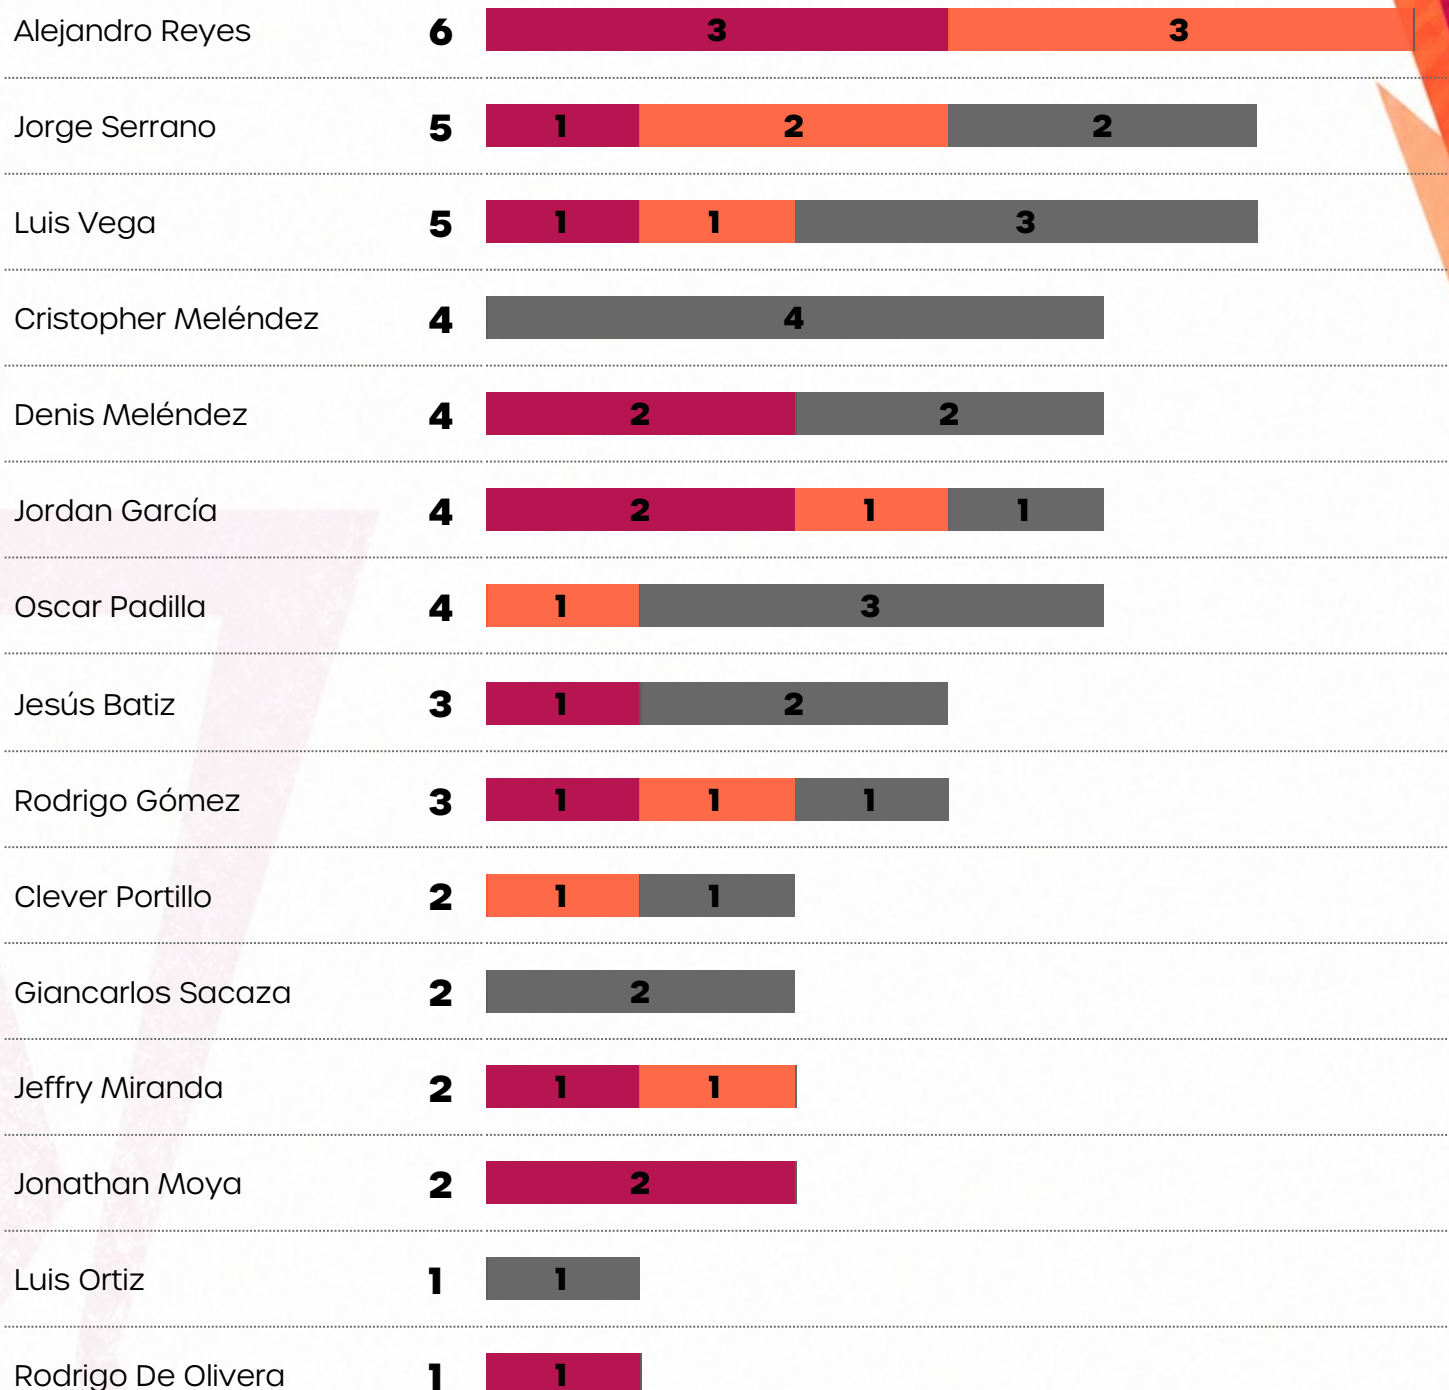

During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence.

This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build up ..

This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build up ..

SEQUENCES INVOLVEMENTS & xG CHAIN

Open Play Sequence Involvement The number of unique open play sequences that a player was involved in. (Note: these are unique because multiple involvements in a single sequence will only count as one involvement).

xG Sequence Involvement (xG Chain) (xG Chain) The total xG value of unique open play shot or goal ending sequences that a player was involved in.
