GAME NOTES

Violette AC

1 - 0

Club Sando

Referee
Alexi Perry

- Violette AC became the first Haitian team in history to top their Concacaf Caribbean Cup group, and only the second overall to win all their matches in this round of the competition after Jamaica's Mount Pleasant in 2025.
- Despite attempting more shots than their opponents (14-8), Violette AC had fewer touches in the opposition box (10-19) and accumulated a lower Expected Goals value (0.55 xG to 0.62 xG) than Club Sando in the Concacaf Caribbean Cup.
- Violette AC became the first team to benefit from an own goal in the last two editions of the Concacaf Caribbean Cup, thanks to Teshorne Ragoo's own goal.
- Violette AC's Elyvens Déjean (16) and Miche-Naider Chéry (14) have combined for more shots in the 2026 Concacaf Caribbean Cup than any other duo in the competition. Today, Déjean led his team with four attempts.
- Violette AC's Jerry Anis made 10 clearances against Club Sando, the most by any Violette AC player in a single Concacaf Caribbean Cup match, one more than the rest of his team combined (nine).

ATTACKING SEQUENCES INVOLVEMENTS

Shot
Chance Created
Build Up to Shot

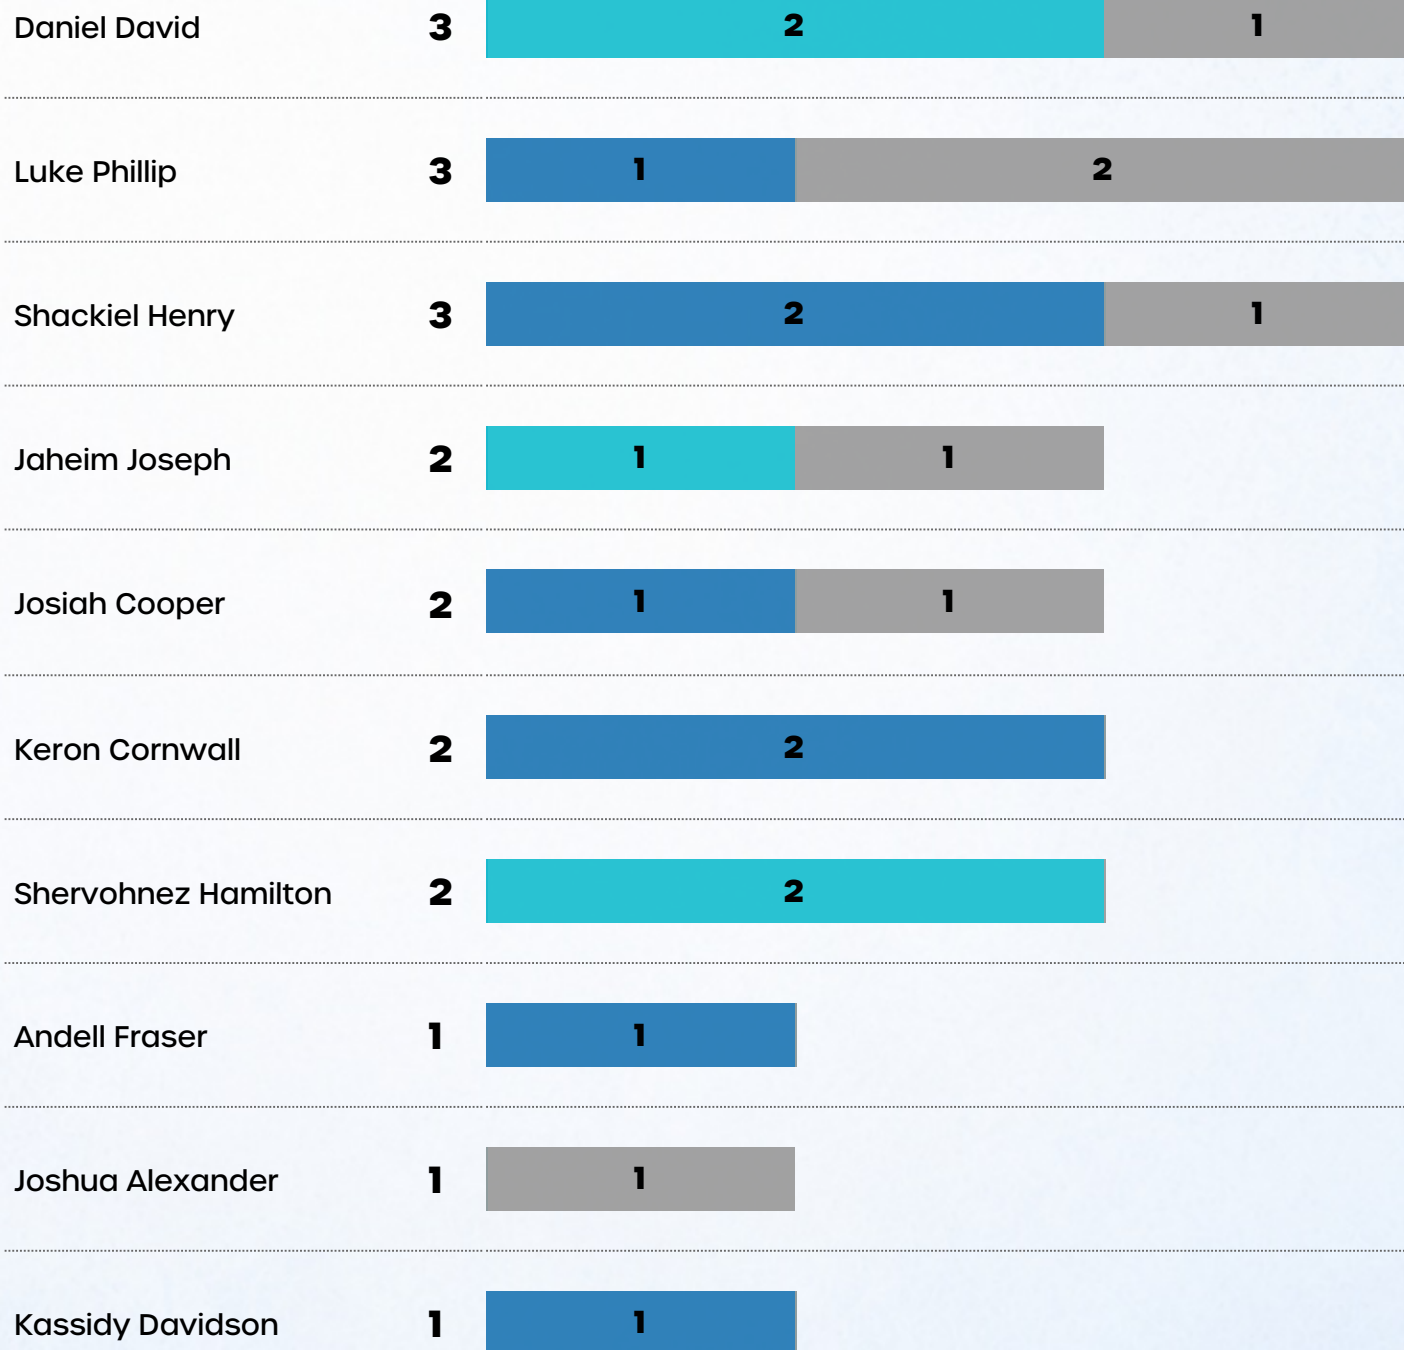

Sequences are a football metric that quantifies the plays within a team's ball possession. It begins when a player performs a controlled action with the ball, such as a pass or dribble, and ends at the end of that play, either with a defensive action by the opposing team, a break in play, or a shot. During a sequence, the participation of each player who performs an action with the ball, whether it is a pass, a dribble or a shot, is recorded. If the sequence culminates in a shot, the player is credited with participating in a shot ending sequence. This participation may be the shot itself, the pass that led to the shot (chance created) or a previous touch in the build ..
